1. Background and Purpose

The Thematic Process of the 11th World Water Forum is being developed through Theme- and Topic-level Working Groups, which form the core structure for preparing the Forum framework. Additional inputs and contributions have been gathered from a broad range of stakeholders through the 1st and 2nd Stakeholders Consultation Meetings.

Drawing on the information, knowledge, experience, practices and initiatives accumulated through this process, the Working Groups have prepared the thematic concept notes available on the Forum website www.worldwaterforum.org. The process is now moving into the development of the sessions through which the resulting outputs and ideas, solutions, innovative practices and initiatives will be presented and advanced during the Forum.
